

Stetson Multi-factor Authentication (MFA) Registration

When you log in to my.stetson.edu, if you're not registered for Stetson MFA, you will see this page and will be prompted to install the Stetson Multi-factor Authenticator app.

Go to the App Store or Google Play to download the Stetson Authenticator app.

Follow the instructions on this page.

Stetson Multi-factor Authentication
Install Stetson Authenticator for iOS/Android

1. Launch the (iOS) App Store or (Android) Google Play Store and search for "Stetson Authenticator".
2. Tap "Get" and then "Install" to download the app.

When prompted, make sure to allow notifications and access to the camera in order to use push authentication and be able to scan the QR code

If you are viewing this page on your mobile device, tap the QR code to launch the app and register. Otherwise, proceed with the following steps

3. Open Stetson Authenticator.
4. Tap the "+" button.
5. Scan the QR code.

829817 

After clicking the Continue button you will see the screen below. You will need to enter and verify your non-Stetson email, SMS phone, and voice phone and then click “Continue” to finish registering. You cannot continue before entering and verifying your information.

Please enter a non-Stetson email, SMS phone, and voice phone number to continue

Non-Stetson Email	<input type="text"/>	<input type="button" value="Verify Email"/>
	<input type="text" value="Enter email validation token"/>	<input type="button" value="Confirm"/>

SMS Phone	Country Code (?)	Area Code	Phone Number	<input type="button" value="Verify SMS Phone"/>
	<input type="text" value="1"/> <small>Ex: 1 for U.S.</small>	<input type="text"/> <small>Example: 123</small>	<input type="text"/> <small>Example: 1234567</small>	
	<input type="text" value="Enter SMS validation token"/>			<input type="button" value="Confirm"/>

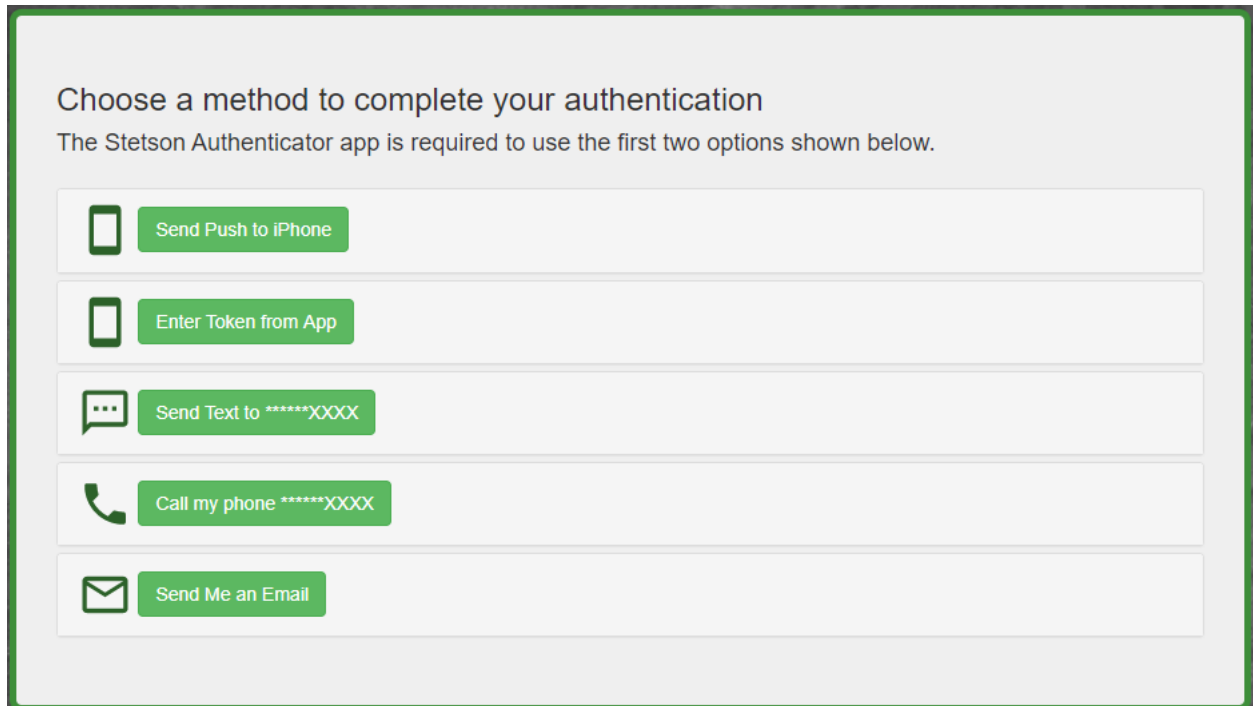

Voice Phone	Country Code (?)	Area Code	Phone Number	<input type="button" value="Verify Voice Phone"/>
	<input type="text" value="1"/> <small>Ex: 1 for U.S.</small>	<input type="text"/> <small>Example: 123</small>	<input type="text"/> <small>Example: 1234567</small>	
	<input type="text" value=""/>			<input type="button" value="Confirm"/>

After clicking the Continue button, you will be asked to set your Stetson MFA preference on the screen below:

By default, MFA is enabled only off-campus. Do you also want to use MFA on-campus?

Logging in with Stetson MFA

When you login with Stetson MFA, you will see the following screen where you can choose a method to complete authentication:

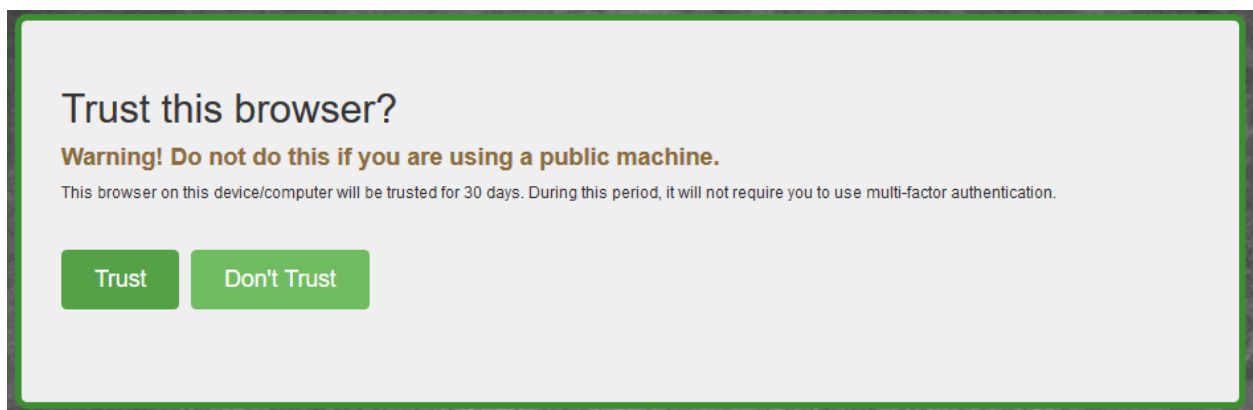

Choose a method to complete your authentication

The Stetson Authenticator app is required to use the first two options shown below.

-  Send Push to iPhone
-  Enter Token from App
-  Send Text to *****XXXX
-  Call my phone *****XXXX
-  Send Me an Email

When authentication is completed, the page will update and you must choose to Trust or Don't Trust this browser.

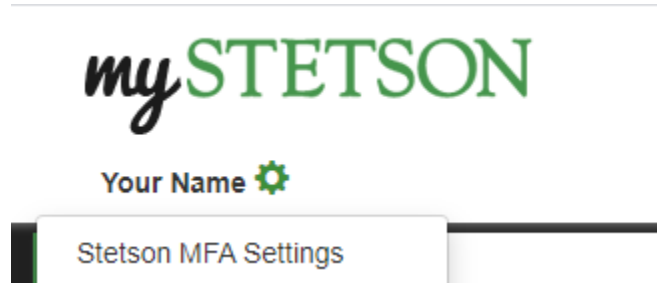

Trust this browser?

Warning! Do not do this if you are using a public machine.

This browser on this device/computer will be trusted for 30 days. During this period, it will not require you to use multi-factor authentication.

Updating your Stetson MFA information

After registering for Stetson MFA, you can update your settings from the Stetson MFA Settings page, accessible through MyStetson from the gear icon located next to your name in the upper left corner.

Your Stetson MFA Settings page lets you update and verify a new non-Stetson email, SMS phone, or voice phone.
